Package inscricaoexames Classes

Class inscricaoexamesController

[line 10]

Component Controller

- **Package** inscricaoexames

void function inscricaoexamesController::criar_alunos() *[line 282]*

- **Access** public

void function inscricaoexamesController::criar_cursos() *[line 13]*

- **Access** public

void function inscricaoexamesController::criar_disciplinas() *[line 62]*

- **Access** public

void function `inscricaoexamesController::criar_modulos()` [*line 140*]

- **Access** public

void function `inscricaoexamesController::criar_turmas()` [*line 209*]

- **Access** public

void function `inscricaoexamesController::editar_alunos([$cid = false])` [*line 310*]

Function Parameters:

- **\$cid**

- **Access** public

void function `inscricaoexamesController::editar_cursos([$disciplinas = false])` [*line 110*]

Function Parameters:

- **\$disciplinas**

- **Access** public

void function `inscricaoexamesController::editar_modulos([$cid = false])` [*line 164*]

Function Parameters:

- **\$cid**

- **Access** public

void function inscricaoexamesController::editar_turmas([\$cid = false]) [*line 237*]

Function Parameters:

- **\$cid**

- **Access** public

void function inscricaoexamesController::eliminar_cursos([\$cid = false]) [*line 37*]

Function Parameters:

- **\$cid**

- **Access** public

void function inscricaoexamesController::eliminar_disciplinas([\$cid = false]) [*line 84*]

Function Parameters:

- **\$cid**

- **Access** public

true function inscricaoexamesController::eliminar_inscricoes() [*line 385*]

Elimina todas as inscrições em exames

- **Access** public

void function inscricaoexamesController::guardar_aluno() [*line 355*]

- **Access** public

Package default Procedural Elements

inscricaoexames.php

- **Package** default

require_once **\$path** [*line 13*]

require_once [JPATH_COMPONENT_DS.'controller.php'](#) [*line 7*]

Package default Classes

Class inscricaoexamesModelAlunos

[line 8]

- **Package** default

true function inscricaoexamesModelAlunos::delAlunos(\$id_list) [line 184]

Function Parameters:

- *id_list* **\$id_list** Um array com o ID das alunos a eliminar

Elimina uma lista de alunos

- **Access** public

boolean function inscricaoexamesModelAlunos::existe([\$id = false]) [line 30]

Function Parameters:

- *id* **\$id** ID do utilizador Joomla! (opcional)

Verifica se um aluno existe, na aplicaÃ§Ã£o

- **Access** public

Object function inscricaoexamesModelAlunos::getAluno(\$id) [*line 264*]

Function Parameters:

- *id* **\$id** O id do aluno

Devolve os dados de um aluno (tabela alunos, turmas e cursos)

- **Access** public

array function inscricaoexamesModelAlunos::getAlunos(\$turmas_id) [*line 154*]

Function Parameters:

- *turmas_id* **\$turmas_id** The course id

Gets the list of alunos in a course

- **Access** public

JTable function inscricaoexamesModelAlunos::getTable([\$type = 'alunos'], [\$prefix = 'inscricaoexamesTable'], [\$config = array()]) [*line 19*]

Function Parameters:

- *type* **\$type** The table type to instantiate
- *string* **\$prefix** A prefix for the table class name. Optional.
- *array* **\$config** Configuration array for model. Optional.

Returns a reference to the a Table object, always creating it.

- **Since** 1.6
- **Access** public

true function inscricaoexamesModelAlunos::insAluno(\$id, \$num, \$turmas_id) [line 49]

Function Parameters:

- *id* **\$id** ID do utilizador Joomla!
- *num* **\$num** Numero de aluno
- *turmas_id* **\$turmas_id** ID da turma

Inserir os dados de um aluno, na aplicação

- **Access** public

true function inscricaoexamesModelAlunos::updateAlunos(\$lista) [line 239]

Function Parameters:

- *lista_de_alunos* **\$lista** Os dados dos alunos

Alterar os dados de vários alunos

- **Access** public

Class inscricaoexamesModelcursos

[line 8]

- **Package** default

true function inscricaoexamesModelcursos::delCursos(\$id_list) [line 110]

Function Parameters:

- *id_list* **\$id_list** An array with the courses id

Deletes the list of courses data from the DB

- **Access** public

array function inscricaoexamesModelcursos::getCursoDisciplinas(\$curso) [line 134]

Function Parameters:

- *curso* **\$curso** The course id

Gets a list of course/disciplinas data

- **Access** public

array function inscricaoexamesModelcursos::getCursos() [line 81]

Gets the list of courses data from the DB

- **Access** public

JTable function inscricaoexamesModelcursos::getTable([\$type = 'cursos'], [\$prefix = 'inscricaoexamesTable'], [\$config = array()]) [line 19]

Function Parameters:

- *type* **\$type** The table type to instantiate
- *string* **\$prefix** A prefix for the table class name. Optional.
- *array* **\$config** Configuration array for model. Optional.

Returns a reference to the a Table object, always creating it.

- **Since** 1.6
- **Access** public

true function inscricaoexamesModelcursos::insCursos(\$lista_de_cursos, 1) [line 58]

Function Parameters:

- *table* **1** JTable representing the table where insertion is to be made
- *lista_de_cursos* **\$lista_de_cursos** The courses data to be inserted

Inserts a list of courses data into the DB

- **Access** public

Class inscricaoexamesModelcursosdisciplinas

[line 8]

- **Package** default

true function inscricaoexamesModelcursosdisciplinas::delCurso(\$curso, [\$db = null], 2) [line 18]

Function Parameters:

- *db* **2** The database object
- *curso* **\$curso** The course id to be inserted
- *disciplinas* **\$db** The disciplina id to be inserted

Inserts a course/disciplina data into the DB

- **Access** public

true function inscricaoexamesModelcursosdisciplinas::getDisciplinas(\$curso, 1) [line 80]

Function Parameters:

- *disciplinas* **1** An array with the disciplinas id
- *curso* **\$curso** The course id to be inserted

Inserts a list of course/disciplinas data into the DB

- **Access** public

true function inscricaoexamesModelcursosdisciplinas::insCursoDisciplinas(\$curso, \$disciplinas) [line 54]

Function Parameters:

- *curso* **\$curso** The course id to be inserted
- *disciplinas* **\$disciplinas** An array with the disciplinas id

Inserts a list of course/disciplinas data into the DB

- **Access** public

Class inscricaoexamesModeldisciplinas

[line 8]

- **Package** default

true function inscricaoexamesModeldisciplinas::delDisciplinas(\$id_list) [line 125]

Function Parameters:

- *id_list* **\$id_list** An array with the courses id

Deletes the list of courses data from the DB

- **Access** public

array function inscricaoexamesModeldisciplinas::getDisciplinaModulo(\$modulos_id) [line 93]

Function Parameters:

- **\$modulos_id**

Gets the list of courses data from the DB

- **Access** public

array function inscricaoexamesModeldisciplinas::getDisciplinas([\$curso_id = false]) [*line 80*]

Function Parameters:

- **\$curso_id**

Gets the list of courses data from the DB

- **Access** public

JTable function inscricaoexamesModeldisciplinas::getTable([\$type = 'disciplinas'], [\$prefix = 'inscricaoexamesTable'], [\$config = array()]) [*line 19*]

Function Parameters:

- *type* **\$type** The table type to instantiate
- *string* **\$prefix** A prefix for the table class name. Optional.
- *array* **\$config** Configuration array for model. Optional.

Returns a reference to the a Table object, always creating it.

- **Since** 1.6
- **Access** public

true function inscricaoexamesModeldisciplinas::insDisciplinas(\$lista_de_disciplinas) *[line 57]*

Function Parameters:

- *lista_de_disciplinas* **\$lista_de_disciplinas** The courses data to be inserted

Inserts a list of courses data into the DB

- **Access** public

Class inscricaoexamesModelinscricaoexames

[line 8]

- **Package** default

false function inscricaoexamesModelinscricaoexames::getIDsModulosInscritos(\$alunos_id) *[line 57]*

Function Parameters:

- **\$alunos_id**

Devolve a lista de IDs dos mÃ³dulos em que um aluno estÃ¡ inscrito

- **Access** public

false function inscricaoexamesModelinscricaoexames::getModulosInscritos([\$alunos_id = false]) [*line 74*]

Function Parameters:

- **\$alunos_id**

Devolve a lista completa de módulos em que um aluno está inscrito

- **Access public**

true function inscricaoexamesModelinscricaoexames::resetInscricao(\$alunos_id, \$modulos_id, \$db) [*line 29*]

Function Parameters:

- **\$alunos_id**
- **\$modulos_id**
- **\$db**

- **Access public**

true function inscricaoexamesModelinscricaoexames::resetInscricoes() [*line 15*]

Elimina todas as inscrições na tabela #__inscricaoexames_inscricoes

- **Access public**

true function inscricaoexamesModelinscricaoexames::setInscricao(\$alunos_id, \$modulos_id, \$db) [*line 43*]

Function Parameters:

- **\$alunos_id**
- **\$modulos_id**
- **\$db**

- **Access** public

Class inscricaoexamesModelModulos

[line 8]

- **Package** default

true function inscricaoexamesModelModulos::delModulos(\$id_list) [line 145]

Function Parameters:

- *id_list* **\$id_list** An array with the modulos id

Deletes the list of modulos data from the DB

- **Access** public

array function inscricaoexamesModelModulos::getModulo(\$id) [line 114]

Function Parameters:

- **\$id**

- **Access** public

array function inscricaoexamesModelModulos::getModulos(\$disciplinas_id) [*line 104*]

Function Parameters:

- **\$disciplinas_id**

Gets the list of modules in a subject

- **Access** public

JTable function inscricaoexamesModelModulos::getTable([\$type = 'modulos'], [\$prefix = 'inscricaoexamesTable'], [\$config = array()]) [*line 19*]

Function Parameters:

- *type* **\$type** The table type to instantiate
- *string* **\$prefix** A prefix for the table class name. Optional.
- *array* **\$config** Configuration array for model. Optional.

Returns a reference to the a Table object, always creating it.

- **Since** 1.6
- **Access** public

true function inscricaoexamesModelModulos::insModulos(\$lista_de_modulos, \$disciplinas_id) [*line 59*]

Function Parameters:

- *lista_de_modulos* **\$lista_de_modulos** Array with the modules data to be inserted
- **\$disciplinas_id**

Inserts a list of modules data into the DB

- **Access** public

true function inscricaoexamesModelModulos::updateModulos(\$lista_de_modulos) [*line 201*]

Function Parameters:

- *lista_de_modulos* **\$lista_de_modulos** The courses data to be inserted

Updates a list of modules

- **Access** public

Class inscricaoexamesModelTurmas

[*line 8*]

- **Package** default

true function inscricaoexamesModelTurmas::delTurmas(\$id_list) [*line 119*]

Function Parameters:

- *id_list* **\$id_list** Um array com o ID das turmas a eliminar

Elimina uma lista de turmas

- **Access** public

JTable function inscricaoexamesModelTurmas::getTable([\$type = 'turmas'], [\$prefix = 'inscricaoexamesTable'], [\$config = array()]) [line 19]

Function Parameters:

- *type* **\$type** The table type to instantiate
- *string* **\$prefix** A prefix for the table class name. Optional.
- *array* **\$config** Configuration array for model. Optional.

Returns a reference to the a Table object, always creating it.

- **Since** 1.6
- **Access** public

array function inscricaoexamesModelTurmas::getTurmas([\$cursos_id = false]) [line 86]

Function Parameters:

- [*cursos_id*] **\$cursos_id** o ID do curso. Se fornecido devolve apenas as turmas deste curso.

Devolve uma lista de turmas

- **Access** public

true function inscricaoexamesModelTurmas::insTurmas(\$lista_de_items, \$cursos_id) [line 62]

Function Parameters:

- *lista_de_items* **\$lista_de_items** Array with the class data to be inserted
- *courses_id* **\$courses_id** The course ID

Inserts a list of turmas data into the DB

- **Access** public

true function inscricaoexamesModelTurmas::updateTurmas(\$lista) [*line 174*]

Function Parameters:

- *lista_de_turmas* **\$lista** Os dados das turmas

Altera os dados de várias turmas

- **Access** public

Class inscricaoexamesTablealunos

[*line 9*]

- **Package** default

Constructor *void* function inscricaoexamesTablealunos::__construct(&\$db) [*line 16*]

Function Parameters:

- *object Database* **&\$db** connector object

Constructor

Class inscricaoexamesTablecursos

[line 9]

- **Package** default

Constructor *void* function inscricaoexamesTablecursos::__construct(&\$db) [line 16]

Function Parameters:

- *object Database* **&\$db** connector object

Constructor

Class inscricaoexamesTabledisciplinas

[line 9]

- **Package** default

Constructor *void* function inscricaoexamesTabledisciplinas::__construct(&\$db) [line 16]

Function Parameters:

- *object Database* **&\$db** connector object

Constructor

Class inscricaoexamesTablemodulos

[line 9]

- **Package** default

Constructor *void* function inscricaoexamesTablemodulos::__construct(&\$db) [line 16]

Function Parameters:

- *object Database* **&\$db** connector object

Constructor

Class inscricaoexamesTableturmas

[line 9]

- **Package** default

Constructor *void* function inscricaoexamesTableturmas::__construct(&\$db) [line 16]

Function Parameters:

- *object Database* **&\$db** connector object

Constructor

Class inscricaoexamesViewalunos

[line 9]

- **Package** default

void function inscricaoexamesViewalunos::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**

Class inscricaoexamesViewcursos

[line 9]

- **Package** default

void function inscricaoexamesViewcursos::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**

Class inscricaoexamesViewdisciplinas

[line 9]

- **Package** default

void function inscricaoexamesViewdisciplinas::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**

Class inscricaoexamesViewinscricaoexames

[line 9]

- **Package** default

void function inscricaoexamesViewinscricaoexames::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**

Class inscricaoexamesViewmodulos

[line 9]

- **Package** default

void function inscricaoexamesViewmodulos::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**

Class inscricaoexamesViewturmas

[line 9]

- **Package** default

void function inscricaoexamesViewturmas::display([\$tpl = null]) [line 10]

Function Parameters:

- **\$tpl**
